The **InfoGraphics Lab** is a cartography and geospatial technology facility housed in the Department of Geography. We serve the Department and the University community of faculty, staff, and students; and the State of Oregon through the application of innovative geospatial technologies, cartographic design, and geographic information science.

We support research, instruction, and public service activities at the University through a range of involvement from stand-alone consultations to multi-year collaborations.

Please contact us with any mapping or project ideas that you would like to discuss!

### We create products for...
- publications
- presentations
- grant proposals
- teaching materials

### We have expertise in...
- print
digital
  - static
  - animated
  - interactive

---

### Brainstorming concepts and design advice

### Data analysis, exploration, and visualization

### Development of web maps and applications

### Advice on mapping software

### Revisions to existing maps and figures

### Creation of new maps and figures

### Research proposals and collaborations
